MODULAR FIXTURING

It's fabrication, but not as you know it.

► LEUSSINK FIXTURING SOLUTIONS

Are you ready to maximise your productivity and accuracy?

Jigging, bending, pressing, punching...

It's not a workout when it's a Demmeler solution from Leussink.

A Demmeler modular fixturing solution not only helps your business achieve a quick return on investment, it also increases productivity. Get your business on the fast track to growth with a Demmeler welding & fixturing table, and you'll not only enjoy faster set up and turnaround times on projects, but also improved accuracy, quality and efficiency while eliminating time consuming rework.

Leussink is the sole partner and distributor of Demmeler fabrication systems in Australia, including their impressive range of accessories. Demmeler's high quality, German made modular fixturing tables and accessories are backed by added research and development by the team at Leussink to deliver a market leading, world-class fixturing solution for Australian businesses. This means we have tried and tested the very solution we're recommending in our very own factory on the east coast of Australia.

We won't just sell you a welding table. We'll arm you with a modular fabrication solution that is tailored to your business needs; from the design of your system right through to after sales support, implementation and training.

Unrivalled accessories

When you purchase a Demmeler modular fixturing system from Leussink you also get access to an extensive range of world-leading and innovative accessories that enable you to get the most out of your new hardware. There is a wealth of Demmeler accessories to choose from, including table leg systems, rail systems, floor plates, clamping plates, clamping pins, stops, spacer blocks, supports, angles, bolts, cleaning products and much, much more. With Demmeler, you can customise the suite of accessories that come with your modular fixturing system to ensure that you have all the tools you need to use the system exactly how you want to use it.

Our customers report a 50% improvement in productivity with a Demmeler system.

Empower your workshop

Designed and built to withstand decades of heavy-duty wear and tear, a Leussink modular welding solution can be configured with the appropriate tooling kit to suit any workshop or production environment. Imagine components that can be added or adjusted in seconds, with no limits – other than your imagination and ingenuity – on the sizes or combinations of fixtures.

Every piece can be quickly set-up, moved and clamped in any direction that's needed. Demmeler bolts are hardened to withstand a high clamping force and have an ergonomically knurled bolt head for fast one-hand operation, allowing your staff more freedom, while also increasing the efficiency level of your work.

Additionally, no part is ever obsolete, meaning all the parts from the first designs through to the latest versions fit on all Demmeler tables. From beginner to expert and every level in between, there is a tool set to fulfil your requirements and enable you to get the most out of your new modular fixturing solution from Demmeler. You can individually assemble or supplement your existing sets with the large selection of accessories offered by Demmeler. No job is too big or too small for this modular fixturing system. And Leussink Engineering has a Demmeler solution for everyone.

“We immediately saw that the Demmeler tables were delivering vastly improved accuracy and control over what had been a cumbersome, time-consuming process using traditional flat-bed fabrication tables. The Demmeler system makes it a lot easier to put pipe spools together accurately and efficiently.”

Austal Limited, WA

THINK. SOLVE. ENGINEER.

Leussink is a solutions-focused engineering company based on the East Coast of Australia. For over 40 years, Leussink has been tackling problems that other businesses deem too difficult. Our dedication to providing best-fit solutions in short time frames has afforded us the opportunity to work with some of Australia's and New Zealand's most iconic manufacturing, resource and production companies. Proudly family-owned and operated, Leussink is unwavering in our pursuit of new challenges and engineering achievements.

Leussink Engineering is the long-term Australian partner and distributor of Demmeler fabrication systems in Australia. Contact us today to find out how a Demmeler system can help you maximise your productivity and accuracy.
