Think. Solve. Engineer.

SHAPE YOUR FUTURE WITH LEUSSINK

Metalwork Apprenticeships for School Leavers
Commencing January 2024

Are you a high school student or new graduate with a passion for crafting, building, and shaping the future? Leussink invites you to embark on an exciting journey into the world of metalwork with our exceptional apprenticeship program!

► Why Choose Leussink?

Industry Leaders

Leussink is a well known name in the Illawarra's manufacturing industry. We have a strong track record, partnering with blue-chip clients that provide a diverse range of experiences across various industries. Our apprenticeship program is your gateway to your future success.

Expert Mentors

Learn from the best. Our team of skilled professionals, many of whom have completed their apprenticeship programs with Leussink, will personally guide you through every step of your apprenticeship. They are committed to ensuring you gain valuable hands-on experience.

Career Growth

Kickstart your career with endless opportunities for growth. We welcome promising new apprentices each year, investing significant time and effort in shaping the future of CNC machinists, metal fabricators, leading hands, and engineers. Your potential will know no bounds at Leussink.

Cutting-Edge Facilities

Leussink is a proud supporter of Australian manufacturing, consistently investing in world class equipment. In our state-of-the-art workshop, you'll work with a diverse range of cutting-edge machines, providing you with the perfect environment to refine your craft.

► Apprenticeship Opportunities

CNC MACHINISTS

Immerse yourself in the world of CNC machining.

You'll gain the skills to interpret drawings, set up machinery, program precision operations, operate cutting-edge computer-controlled machining equipment, and oversee the crafting of intricate components with unwavering precision.

METAL FABRICATORS

Explore the art of metalwork.

You'll learn the techniques of cutting, shaping, welding, assembling, and repairing metal products. Your craft will contribute to the creation and maintenance of vital industrial parts and components.

WELDERS

Become a master of the welding craft.

You'll perfect the skills of MIG, TIG and stick welding, as well as gouging. Using a multitude of different wires and gases to achieve structurally sound welds, and working to relative procedures and Australian standards.

► Apprenticeship Highlights

Practical Learning

Gain hands-on experience in metalwork, welding, fabrication, and CNC machining under the guidance of seasoned professionals.

Skill Development & Certification

Hone your expertise in metalworking and precision cutting, and earn a nationally recognised certificate upon successful completion of your apprenticeship.

Rewarding Compensation

We believe in rewarding hard work. Enjoy competitive pay and performance-based incentives that acknowledge your contributions and efforts.

Supportive Environment

Our team is like family. We provide a great work environment, on-the-job training supplemented by TAFE, inclusivity, and access to the latest technology.

► How to Apply

Ready to shape your future with Leussink?

Follow these steps to apply for our metalwork apprenticeship:
